The PyBaMM model zoo

Goals

A shared place for models
One place to find and use models built on PyBaMM.

Easier to contribute
Contribute a model without learning PyBaMM's internals.

Models that keep working
Tested as PyBaMM changes.

Maintenance levels

Community
Maintained by its authors. Tested against every PyBaMM change, but never blocks a release.

Core
Adopted and maintained by the PyBaMM team.

Where models live

In the PyBaMM repository
Alongside the other zoo models.

In your own repository
Registered with the zoo, so it is found and checked the same way.

Proper credit
Wherever a model lives, using it cites its authors automatically.
